A high quality, technologically advanced, low cost manual press, ideal for most users. The swing head operation gives a perfect view of the transfer and garment, allowing accurate and easy application, along with safety of operation.

Fitted with our unique advanced computerised controller to accurately monitor both temperature and time.

Pressure adjustment is by a fingertip control knob, making this machine ideal for both light and heavy pressure requirements.

The Beta Maxi is a manually operated heat press for transfer printing and material fusing. It is ideal for medium volume production.

Our specially designed microprocessor controllers give accuracy for time and temperature settings, vital with today's heat transfers.

**HEAT PLATES
SILICONE PADS****Heat Plates - Silicone Pads**

All heat plates are covered with a protective TEFLON® coating and many are made of cast aluminium (cast aluminium heat plates carry a life-time warranty). Quality silicone rubber base pads are used to provide excellent transfer results every time.

APPEARANCE**Appearance**

To maintain the good appearance of the press all cast frames are powder coated. This proven baking system will protect the machine from discolouration and minor knocks and scratches.

OPERATORS MANUAL**Operators Manual**

Full specification and operating instructions on all aspects of the machines, electrical diagrams, exploded diagrams and parts list are included with every machine.

SERVICE - PARTS**Service - Parts**

You can always speak directly to our service department technicians for any technical support or information. We also carry spare parts for all of our machine range.
