SpaceControl3
by TheMagicTouch®

QuickSetUp Guide for all
OKI CMY+W Printers and SpaceControl3
Note: Only Windows/PC compatible via USB!
Not compatible with Mac and Network.

1. Install Driver and Printer according OKI's original SetUp instruction.

Note: Before installing SpaceControl3 make sure the Printer is connected via a USB cable, Driver installed and powered on!

2. Install SpaceControl3 via the SetUp.exe and follow the dialog.

3. Launch SpaceControl3.

4. Select the 'Utility' tab and select 'License Install'. Find the License File you received from us and select 'Open'. Your License will install and window will close.

5. Select the 'Utility' tab and select 'Printer Mode'. If you wish to use the SpaceControl3 Print Utility press the 'Driver Off' button.

Congratulation! Your Printer is now ready to work with SpaceControl3 by TheMagicTouch. If you encounter any trouble please contact us via: http://www.themagictouch.com/copyprob.html
