

METALFLEX

MetalFlex is a 100% PU Film !

Light, very stretchable and with a beautiful metal effect. You will never have to worry anymore about washing a metallic heat transfer film because MetalFlex brings you an excellent 40°C washing fastness.

FEATURES

- > Heat sealable PU
- > Thickness (without liner): 50µ
- > Fastness: 40°C
- > Transfer Temperature: 160-170°C (330°F)
- > Transfer Time: 17-15 seconds
- > Pressure: Medium/High
- > Tip - Waiting for the product to cool down 20 seconds before removing the liner after pressing will give a shinier finish
